Himanshu Joshi

+91-8534010083 | hjjoshi020@gmail.com | GitHub | Portfolio | Linkedin

PROFILE

Computer Applications graduate who builds complete web products and AI-based applications from idea to deployment. Comfortable working on real-world problems, improving systems through iteration, and turning concepts into usable software

EDUCATION

Graphic Era Hill University, Haldwani

Bachelor's in Computer Application | 2022 – 2025

- Relevant coursework: Web Development, Database Management, Software Engineering, AI & ML.
- Consistently excelling in practical project implementation and hands-on learning.

SKILLS

Programming Languages: Java, Python, JavaScript, C
Backend: Spring, Spring Boot, Spring MVC, Hibernate, JPA, REST APIs
Frontend: React.js, Next.js, HTML, CSS, Tailwind CSS
Databases: MySQL, PostgreSQL, SQLite
Testing & Build: JUnit, Mockito, Maven
Tools: Git, GitHub, Postman, Jira, Agile, Scrum

EXPERIENCE

Cognizant

Analyst Trainee | Apr 2026 – Present

- Completed ADM training focused on **Core Java, Spring, Spring Boot, Spring MVC, Hibernate, JPA and REST APIs**.
- Developed hands-on applications using **Java, Spring Boot, MySQL, JPA/Hibernate, and RESTful APIs**.
- Implemented unit testing using **JUnit and Mockito** and managed builds and dependencies with **Maven**.
- Used **Git, GitHub, Postman, and Jira** while following **Agile/Scrum** development practices.

PROJECTS

Retail Point of Sale System | Cognizant Training Project

- **Built with:** Java, Spring Boot, Spring MVC, Hibernate, JPA, REST APIs, MySQL, HTML, CSS, JavaScript
- Implemented key modules including authentication, billing, product, inventory, promotion, and reporting.
- Designed RESTful APIs and integrated MySQL database operations using JPA/Hibernate for core retail workflows.

Node-based Visual Editor | Jun 2025 – Sep 2025 (Link)

- **Built with:** React.js, React Flow, Python, FastAPI, Tailwind CSS, Zustand, Vercel, Railway
- Developed a modular node-based editor to visually design workflows with custom nodes
- Implemented a global variable store with dynamic data passing across nodes, enabling live previews.

Smart AI Mock Interview App | Jan 2025 – Mar 2025 (Link)

- **Built with:** React.js, Next.js, Tailwind CSS, Gemini AI, Clerk, shadcn, Vercel, PostgreSQL
- Designed and developed a interview practice platform with AI driven feedback to improve interview performance.
- Created a blog page where only the owner can post content, with options to edit, like, comment, and delete.

INTERESTS

- Software engineering and building scalable, efficient solutions.
- Problem-solving through innovative software design
